SUBGRANTEE Harrisburg City
SUBGRANT# 2022-CG-01-39072
AMENDMENT# 2

This AMENDMENT to the existing Subgrant Agreement which was entered into by the Pennsylvania Commission on Crime and Delinquency and the above-referenced Subgrantee will serve to revise and be a supplement to said Subgrant Agreement.

WHEREAS, the Subgrantee has submitted the attached Project Modification Request which explains and justifies the requested amendments.

NOW THEREFORE, in consideration of the promises herein contained in the Project Modification Request and with the intent to be legally bound, the parties agree to the amendments.

All other terms and conditions of the original Subgrant Agreement and prior amendments will remain in full force and effect throughout the duration of the Subgrant Agreement.

Explanation or Justification of Requested Modification:

The Harrisburg Bureau of Police is seeking approval for a project modification to implement a combined system of surveillance cameras and license plate readers (LPRs) as a more effective and cost-efficient alternative to ShotSpotter for combating gun violence in the City of Harrisburg. Given the recent surge in homicides and aggravated assaults, this new approach is designed to deter criminal activity, enhance law enforcement's ability to investigate violent crimes, and improve information-sharing with other agencies. The system will provide continuous surveillance in high-crime areas, aiding investigations and reducing the overall crime rate in Harrisburg, particularly gun violence. With a population of just over 50,000 people residing in approximately 12 square miles, Harrisburg is one of the top ten most densely populated cities within Pennsylvania. When utilizing data from the FBI's 2018 Uniform Crime Report, Harrisburg ranked in the top 100 most dangerous cities. In 2024, the city saw a dramatic 57% increase in homicide rates compared to the previous year, with 23 homicide victims and 259 aggravated assaults. Additionally, the City has already had 5 homicides thus far in 2025. These statistics underscore the urgent need for innovative solutions to address violent crime and prevent further escalation. While ShotSpotter has been utilized to detect gunshots and alert law enforcement, the high cost of maintaining this system beyond the grant funding period has prompted the need for a more sustainable solution. A solution of surveillance cameras combined with LPR technology offers a more affordable and effective alternative for detecting and addressing violent crime in Harrisburg. Moreover, the city will benefit from the ability to share information with other law enforcement agencies, reducing duplication of efforts and enhancing the overall effectiveness of crime prevention and investigation. Research consistently shows that surveillance cameras and LPR technology have a positive impact on reducing crime, particularly in areas with high levels of gun violence. Studies have demonstrated that the presence of cameras serves as a deterrent, as offenders are less likely to commit crimes if they know they are being recorded. Additionally, LPRs have been shown to aid in the rapid identification and apprehension of suspects involved in criminal activities. For example, in the past few months, private security cameras and LPRs assisted the Harrisburg Police Department in solving two armed robberies and one homicide. These incidents highlight the effectiveness of such technologies in aiding investigations and enhancing law enforcement's ability to solve cases. We propose the installation of a system of high-definition surveillance cameras and strategically placed license plate readers throughout the city, with a focus on areas that have a high concentration of gun violence and criminal activity. Quotes will be obtained from multiple vendors to ensure we can make an informed decision that offers the best value for our budget. By implementing this system, we anticipate reducing crime rates, increasing investigative success, improving clearance rates, and increasing community confidence by sending a clear message that the city is taking proactive steps to combat gun violence and ensure public safety. The installation of surveillance cameras and license plate readers, as an alternative to ShotSpotter, represents a forward-thinking approach to addressing the city's crime challenges. With a focus on reducing gun violence, improving investigative capabilities, and ensuring sustainability, this project will significantly enhance the city's ability to protect its residents and prevent criminal activity. We respectfully request approval to proceed with this initiative through a project modification. Additionally, we are removing the request for funding for a Forensic Investigator and moving that portion of the budget into increased saturation details. As we struggle to increase our personnel, filling this position is not feasible at this time. Therefore, we request this budget line item be moved into our existing line item for saturation details. With the warmer months and school ending soon, we anticipate needing to increase the number of details, as well as personnel working the details (if available), to combat the increased gun violence in Harrisburg this year.

BUDGET DETAILS**A. AGENCY BUDGETS****Line Item Details for: Harrisburg City****YEAR 1****PERSONNEL**

Justification: We have removed the funding for another forensic investigator, as we do not feel we will be able to fill this position with our already low personnel numbers. Therefore, we are moving some of the originally requested funding for that position into the saturation detail overtime costs, as we anticipate needing to increase the number of details over the next few months.

COST**Position:** Overtime**Name:** Overtime

# Budgeted Hours / Week	# Weeks	Hourly Pay Rate	COST
40	x 52	x 96.15	199,992.00
Standard working hours per week: 40.000 hrs.			% Budgeted Hours: 100
			Personnel - Year 1 Total: 199,992.00

EQUIPMENT

Justification: Harrisburg City is requesting funding to purchase Cellebrite as a sole source vendor, with funding for two years. A justification for the sole source request was submitted to our fiscal and program contacts for this grant.

Additionally, we are requesting funding to purchase fixed license plate readers and cameras for hot spots of gun violence throughout the city in lieu of gunshot detection technology. After receiving a quote for ShotSpotter, the recurring costs of the technology are cost-prohibitive to the City at this time. We are currently researching costs and obtaining quotes for license plate readers and surveillance/overview cameras. We believe these will be better suited to the needs of the City in the investigation and prosecution of gun violence, with the additional benefit of less expensive recurring costs.

COST**Item:** Cellebrite - two year cost

Total Unit Cost per item	Quantity	% Applied to Grant	COST
66,959.91	x 1	x 100.00	66,960.00

Justification: Harrisburg City is requesting funding to purchase fixed license plate readers and cameras for hot spots of gun violence throughout the city in lieu of gunshot detection technology. After receiving a quote for ShotSpotter, the recurring costs of the technology are cost-prohibitive to the City at this time. We are currently researching costs and obtaining quotes for license plate readers and surveillance/overview cameras. We believe these will be better suited to the needs of the City in the investigation and prosecution of gun violence, with the additional benefit of less expensive recurring costs. Harrisburg City will use a competitive bidding process to procure any equipment for which the budget for the equipment in question exceeds \$10,000.00, and Harrisburg City will keep on file electronically and in paper format any and all documents related to this competitive bidding process for any item in question.

Additionally, Harrisburg City decided to purchase Blink video doorbells instead of Ring video doorbells due to price considerations. We have also removed money from the second year of the porch lights and doorbells (both purchase and installation) as we are still gauging community interest, and do not anticipate needing additional units at this time. We have moved this funding to other areas, including necessary accessories for Cellebrite.

COST**Supply Item:** Video Camera Doorbell installation
